

**Triple glazed windows and doors that save you even more money on your heating bills**

**Improving your home**  
with the latest technology

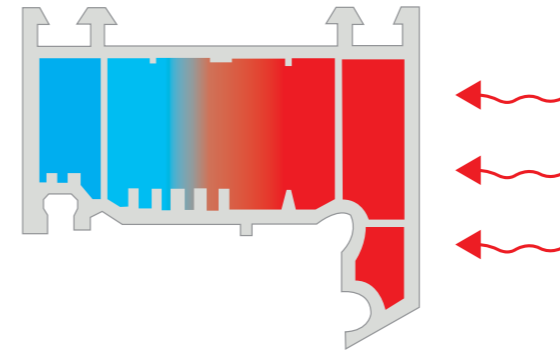

## WINDOWS

### 50% lower U value

EnviroHome has a U value 50% lower than most new double glazed windows

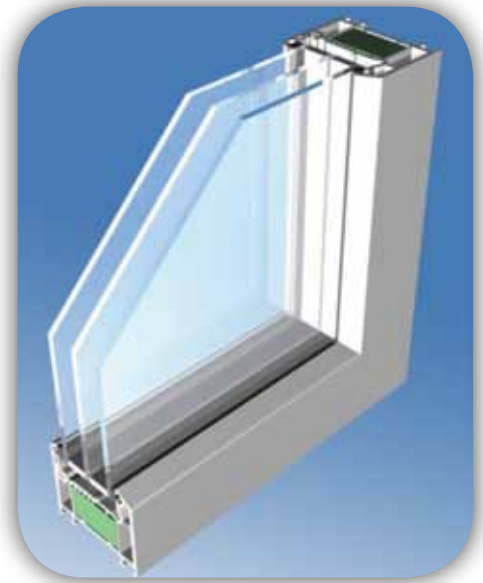

U-Value is the measure of the rate of heat loss. The lower the U-value, the less heat that is needlessly escaping from your home.

### EnviroHome Windows are Certified 0.8 U value

U-VALUE  
**0.8**  
W/m<sup>2</sup>K

EnviroHome  
U Value Certified

- Triple glazed
- Thermal-core insulated frame

### How EnviroHome windows save you even more money on your heating bills

Scandinavian countries developed Passivhaus standards, the highest levels of energy efficiency in both winter and summer to withstand extremes of hot and cold.

For our increasingly unpredictable climate we've created EnviroHome Windows. Designed to achieve the high insulation performance demanded by Passivhaus standards to bring you the very best in energy saving for your home.

EnviroHome windows are Triple Glazed with thermal-core insulated frames to keep more heat in your home. They have a U value of 0.8W/m<sup>2</sup>K for the whole window - 50% lower than most new double glazing.

Using less heat means a smaller carbon footprint and because EnviroHome windows are also lead free they're better for you and the environment.

### Triple glazing is better

The Energy Savings Trust say installing new highly insulated windows is one of the most effective ways to save energy and The Sustainable Energy Authority state triple glazed windows are typically more energy efficient than double-glazed.

### Less noise

EnviroHome windows reduce the level of noise pollution from outside your home for a quieter way of life.

### Less condensation for a clear outlook

The glazing technology in EnviroHome can reduce condensation on the inside of your windows by up to 70%. Cutting condensation reduces mould growth and bacteria that can aggravate respiratory conditions like asthma.

### EnviroHome is available in a huge range of woodgrain and colour finishes

## COMPOSITE DOORS

### Triple glazed and thermal-core insulated GRP doors

Can achieve a U value as low as 1.1

EnviroHome Composite Doors are ultra stylish - they look great, keep heat in and the elements out.

EnviroHome Composite Doors are also very secure and have been awarded Secured by Design approval, the Police security standard

EnviroHome doors are certified to PAS23/24 performance and security tests.

### A Grand Entrance

You can choose from a huge range of colours and decorative glass options to create a beautiful entrance for your home.
